Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/600,416	Applicant(s) RICKERD, CLAUDE L.	
	Examiner Catherine N. Witczak	Art Unit 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Upon reconsideration of the election/restriction requirement, Applicant's arguments (5/23/2006) are considered persuasive, and all previously presented claims have been examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

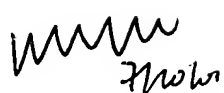

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Groshong (US 4,772,266) in view of Kanno (US 4,629,455) as further modified by O'Neil (US 4,436,519).

Claims 1, 2, 7, 9, 10, 11, and 15: Groshong discloses a splittable sheath (14) comprising a threaded nipple (110, 122) and an adaptor (12) comprising a threaded shaft (24, 38), a cannula (22) interfacing with the lumen of the sheath (20), and a sliding connector (56) comprising internal threading (64) for engagement with the engagement means of the sheath and an annular lip (52) extending radially inward.

Claims 3 and 8: Groshong discloses an elastomeric O-ring (44) that interfaces the interior of the sliding connector (56) and cannula portion (22).

Claim 6: Groshong discloses in column 4, lines 15-21 that the interface between the engagement means of the connector and sheath, as well as the sealing means creates a fluid seal.

Art Unit: 3767

Claim 12: Groshong discloses in Figure 3 the cannula portion being in the form of a frustrum tapering distally (28).

Claims 13 and 14: Groshong discloses in Figure 3 the diameter of the proximal end of the frustrum (28) being larger than the diameter of the middle portion of the shaft (22), defining an annular shelf (44), which as an O-ring, creates a fluid tight connection between the sliding connector (56) and the annular lip (52).

Groshong discloses the claimed invention except for the cannula portion comprising two wedges located 180 degrees apart from each other the outer surface of the cannula. Kanno teaches it is known to use two wedges (19) spaced 180 degrees apart on a cannula in Figure 3. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system as taught by Groshong with wedges as taught by Kanno, because such a modification would provide as support surface for the sliding connector and would also aid in splitting the slittable sheath (column 4, lines 45-59).
[Claims 4 and 5]

Groshong as modified by Kanno discloses that claimed invention except for the system including hemostasis valve with an internal thread for connecting to the adaptor. O'Neill teaches in Figure 2 that it is known to use a hemostasis valve with internal threading connected to an adaptor which is further connected to a sheath. It would have obvious to one having ordinary skill in the art at the time the invention was made to modify the system as taught by Groshong as modified by Kanno with a hemostasis valve including an inner thread as taught by O'Neill, since such a modification would provide the system with a hemostasis valve to stop blood flow that could be connected to the splittable sheath.

Art Unit: 3767

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine N. Witzak whose telephone number is (571) 272-7179. The examiner can normally be reached on Monday through Friday, 8-5 EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
